**COMPONENT: CHILD DISABILITIES**

**SUBJECT: REFERRALS**

**PERFORMANCE OBJECTIVE:** To establish that Head Start will inform parents and coordinate with staff to ensure screenings are conducted within the child’s first 45 calendar days from the first date of attendance. The program will implement on-going assessments to determine the child’s skill level, progress, and identify the need for further evaluation or programming planning changes. Through the screening process from the child development professional, a program must, with parent’s consent, promptly and appropriately address any needs identified through a referral to the local agency responsible for implementing IDEA for a formal evaluation to assess the child’s eligibility for services. If a child is determined eligible for services, the program must partner with parents and the local agency to deliver the services. The program will follow up as appropriate for each child with a health problem or developmental delay. The Program will develop a system to track referrals and services provided and monitor the implementation of a follow up plan to meet any treatment needs.
